RESEARCH THE NEW NIGHTINGALE HOSPITALS

- How many are there?
- Where are they located?
- How many beds does each one have?
- What is the difference between intensive care and a normal ward?

Challenge

- How is the development of these hospitals going to impact the spread and control of the coronavirus?

RESEARCH TASK: FIND OUT WHAT THESE PIECES OF MEDICAL EQUIPMENT ARE USED FOR.

- Identify the piece of equipment is and what they are used for.
- Describe how they are used.
- Discuss the importance of this piece of equipment in treating coronavirus.

Extension:

- Where possible find out how many of each piece of equipment the UK currently has?

Medical equipment	What is it? And what is it used for?	How is it used?	What is its purpose in treating coronavirus?
Spirometry			
IV drip			
Ventilator			
Sphygmomanometer			
Oxygen analysers			
Thermometer			

PPE (PERSONAL PROTECTION EQUIPMENT)

Answer the following question:

- What is PPE?
- What elements make up a doctors PPE?
- Why is it needed?
- How does PPE effect the spread of the virus?

Challenge:

How might wearing PPE effect a doctors ability to carry out their role effectively?

EXTENSION: DESIGN YOUR OWN PIECE OF PPE

Create a poster/drawing of a piece of protective equipment that you have created/modified.

- What does it look like?
- How does it work?
